- ▶ Maize Flour Premixes
- ▶ All other kinds of Staple Food Fortification Premix

Our **Work**

Due to different challenges like eating habits, Economical crises, Poverty, War, and Climate Change. People are not getting the optimum micronutrients through their food. To tackle these challenges government is promoting Food Fortification in different Staple Foods, Milk, and Edible Oil. As well as giving supplementary food (THR) by adding micronutrients to the targeted population through ICDS. Vitaline is providing all kinds of Premix for fortification purposes like Wheat, Rice (Fortified Rice Kernel), Maize, Milk and Edible Oil.

Our **Aim**

Vitaline aims to fulfill the requirements of today's nutritional needs. As we know the world is facing a great challenge and burden of Micronutrient Malnutrition. We aim to deliver value-added ingredients/Micronutrient Premix to the food, Rice, Wheat, and nutrition industry.

Our **Value**

◆ Humanity

◆ Honesty

◆ Hygiene & Safety

Our **Significance**

As per WHO Adequately designed and implemented food fortification and supplementation policies with Iron, Folic acid, Vitamin A, D, Zinc, Calcium, and other micronutrients fortification (not exceed Tolerable Upper Intake Levels) is safe, proven, and cost-effective intervention to improve micronutrient status and other health outcomes, including prevention of spina bifida and, anencephaly.
